Our focus is 100% on serving our customers

More than 30,000 professionals around the world use Neodent products

More than 5 million implants sold since 1993

A documented success rate of 96.5%

More than 150 scientific articles and publications

The leader in the Latin American market with a market share greater than 30%

More than 245,000 patients were treated with Neodent implants in Brazil during 2012

3,4 Neodent internal data on file.
7 BRIC markets for Dental Implants 2012, Millennium Research Group
Innovation and technology

NeoPoros, a unique surface with a history of more than 10 years

The NeoPoros surface was developed using a process of sand blasting and acid etching.

Through automated control in our state-of-the-art factory, the process for creating this surface is maintained.

Scanning electron microscope (SEM) images of the NeoPoros surface at 2000X and 3000X amplification (images 1 and 2 respectively) show controlled roughness with a pore size of between 2.5 and 5.0μm across the surface of the implant. The uniform roughness results in a surface topography optimized for osseointegration.

Bone to implant contact (BIC) histological performance at 15 and 30 days

The formation of new bone at an early stage after implant placement demonstrates the excellent performance of the NeoPoros surface.
Supporting dentists with solutions

Implants and connections suited to meet your clinical needs

The Neodent implant system has been developed to deal with all types of clinical situations. Its wide range of products enable professionals to deliver solutions according to their clinical preference.
A collaboration in search of excellence

The Neodent and ILAPEO partnership has resulted in a new standard of excellence for education, clinical research, product development and case resolution worldwide. By involving leading implantology experts with training new professionals, research and clinical case review, this collaboration has created new and innovative solutions for the implant market.

ILAPEO
Scientific support and research

One of Neodent’s pillars of success is the continuous investment in research and development and the promotion of knowledge. In support of this pillar, Neodent has partnered with ILAPEO (The Latin American Institute of Dental Research and Education), a renowned center of excellence in research, development and innovation in dental clinical practice.

ILAPEO is an institution made up of professionals, teachers and researchers whose aim for the last 10 years has been to offer recognized and certified postgraduate, specialist and master’s courses.
Since its founding in 2004, more than 3,000 professionals from around the world have been trained at ILAPEO;

ILAPEO offers specialist, postgraduate and master’s courses for clinicians;

ILAPEO collaborates with Neodent in the development of new technologies and solutions to provide the best possible outcomes.
